Automation in the Age of AI

Introducing UiPath Maestro Automate

THE LANDSCAPE

Opportunities and challenges

01 · OPPORTUNITY

New use cases

Technology reaches work that was out of reach.

- **Judgment, not just clicks**
- **The long tail becomes addressable**

02 · OPPORTUNITY

Changing personas

People are ready to explore.

- **Builders beyond the RPA team**
- **Curiosity is high, so use it**

03 · CHALLENGE

Too many products

Mediocrity won’t survive the noise.

- **Differentiation has to be real**
- **Conveying it matters as much**

New use cases, new builders, and a crowded market to stand out in.

AGENDA

What we will cover

1	**Maestro Automate**	What it is, what you can build and where
2	**Build live**	
3	**Under the hood**	The coding agents stack, Skills and the CLI
4	**Go build**	Set up UiPath, use cases to try, how to reach us

In an hour: see it run, then build it live.

MAESTRO AUTOMATE

Introducing Maestro Automate

Short-running workflows that combine AI agents, APIs, documents and people on one visual canvas.

One canvas
Agents, connectors, documents, humans

Built by your coding agent
Or drag the nodes yourself

Runs on UiPath
Governed and traced from the first run

Start in Automate. Grow into Maestro Orchestrate when the work runs for days.

WHAT YOU CAN BUILD

What you can build

PREVIEW

Voice agents

Resolve it on the call

PREVIEW

Chat agents

Resolve it in the chat

Document processing

Extract the fields, then act

AI agents

Decide, with a reason

APIs and data

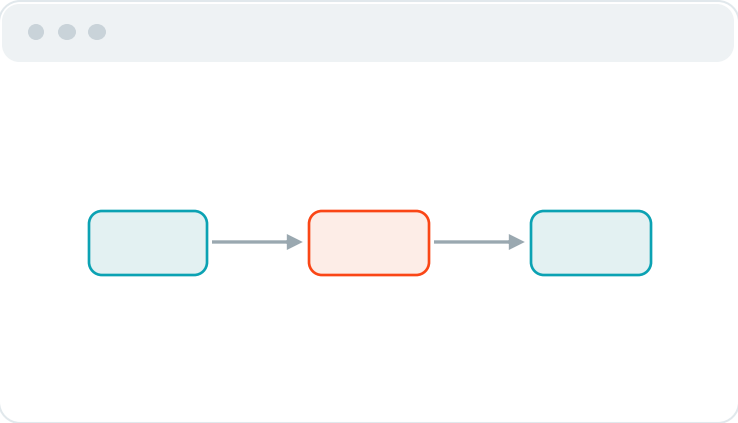

Hundreds of connectors

Human in the loop

Approve where it matters

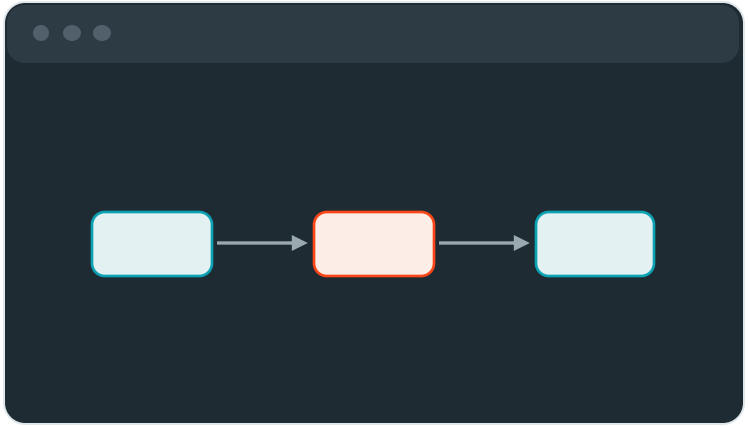

WHERE YOU CAN BUILD

Where you can build

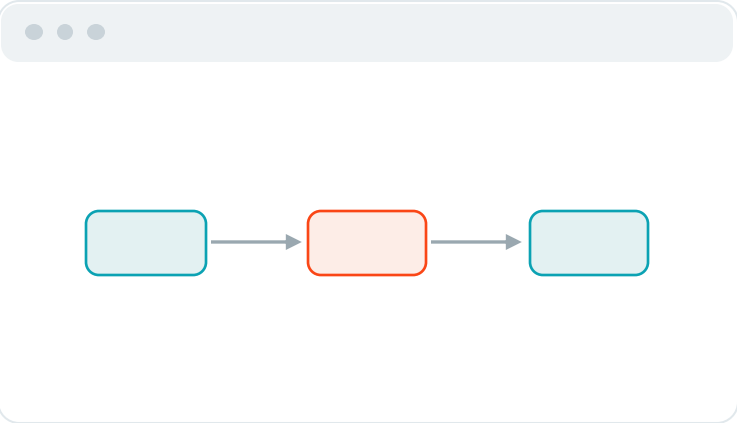

Studio Web

In the browser. Nothing to install.

VS Code

Maestro extension, in your repo.

Studio Desktop

Next to your RPA workflows.

With your coding agent

Claude Code | Codex | Copilot | Cursor | Autopilot

UiPath

THE SCENARIO

DevPulse, an AI newsletter

See it run, then build it live

SCENARIO

DevPulse: a daily AI newsletter

TRIGGER

Manual trigger

Topic and recipient

HTTP REQUEST

Fetch the news

Hacker News via the free Algolia API, last 48 hours

AGENT

Editor

Picks the top 5, writes the HTML issue, screens every story

END

Done

Sent, sent after approval, or held

THE EDITOR AGENT DECIDES

SEND

Nothing flagged

The agent calls Send Email (Outlook 365) and the issue goes out.

ESCALATE

A story is vulgar or controversial

Editor review: a person sees the reason and the draft, then approves or rejects.

One HTTP call, one agent, a person only when a story is flagged.

THE STACK

The coding agents stack

↑ TIME TO VALUE

Surfaces WHERE USERS BUILD
Studio • Terminal / CLI • VS Code

Coding agents WHO BUILDS
Opus • Sonnet • Other models

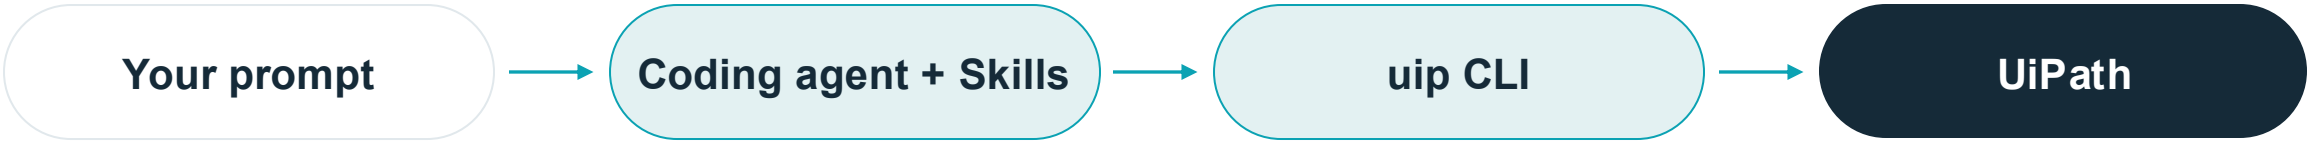

Skills WHAT THEY USE
Maestro • RPA • Integration • Platform

UiPath platform capabilities VIA THE CLI
Connectors • Activities • Orchestrator APIs • Credential stores

Surfaces on top, the UiPath platform underneath, reached through the CLI.

SKILLS AND THE CLI

Skills know how. The CLI does it.

1

Skills know how

They teach your coding agent how UiPath flows are built.

```
Install once:  uip skills install
```

2

The CLI does it

Your coding agent runs uip commands to build, check and run the flow.

```
Sign in once:  uip login
```

Together: every coding agent ships UiPath out of the box.

UiPath

WHAT NEXT

Go build.

Rebuild DevPulse tonight. Then build your own.

SET UP UIPATH

Set up UiPath

1

Sign up free

Community plan on UiPath Automation Cloud

cloud.uipath.com

2

Install the UiPath Maestro extension

In VS Code or Cursor. Or skip it and use Studio Web in the browser

VS Code Marketplace: UiPath Maestro

3

Connect your coding agent

Install the CLI, add UiPath skills, sign in

```
npm install -g @uipath/cli
uip skills install  ·  uip login
```

Setup guide

4

Create a Flow project

New Flow project in VS Code or Studio Web, then prompt your coding agent to build DevPulse

Flow in VS Code guide

TOP USE CASES

Top use cases to build for yourself

Morning inbox digest
Summarize what needs a reply today

Job hunt tracker
Log applications, nudge follow-ups

Receipt and expense log
Read receipts, track monthly spend

Study notes and quiz
Turn lecture PDFs into notes and a quiz

Voice reminders
Call in, the agent adds it to your calendar

Price drop alerts
Watch a product, ping you when it drops

REACH OUT

Join us on the UiPath Forum

THE GROUP

UiPath GeeksforGeeks 2026

Ask questions, share what you build, and get help from us after today.
